

Infection Screen- Domestic Travel

Infection Screen

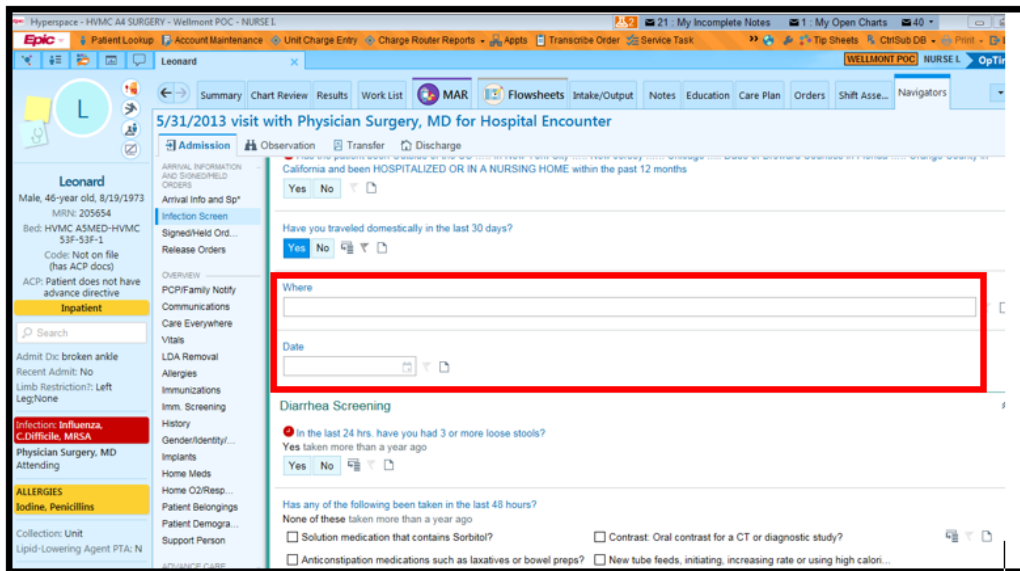

A new question has been added to the Infection Screen that states:

- “Have you traveled domestically in the last 30 days?”

Infection Screen- Domestic Travel

- If the answer is “**Yes**”, additional data fields for the clinician to enter “**Where**” (location of where the patient traveled) and the “**Date**” (**date the patient traveled**) will cascade in. Enter the patient’s responses into the applicable fields.

The BPA that previously fired when the answer to the question was “Yes” has been deactivated and no longer will fire.
